

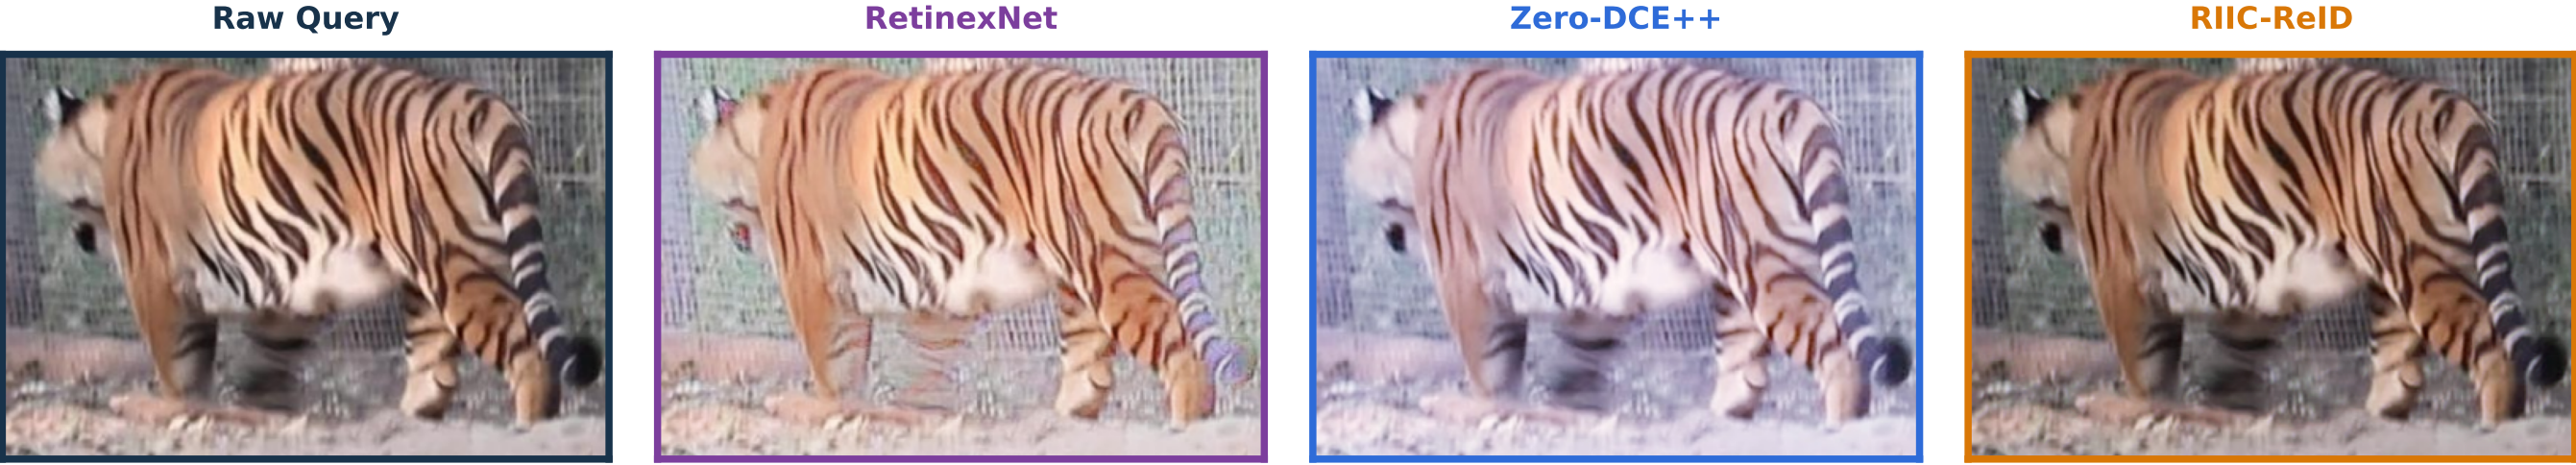

Figure 1. Retrieval-preferred correction is not equivalent to human-perceptual enhancement.

A real ATRW query. RetinexNet and Zero-DCE++ change the image appearance strongly, but RIIC-ReID keeps the query in a more retrieval-favorable region.

RetinexNet

retrieval

AP = 0.430

correct@5 = 3/5

Zero-DCE++

retrieval

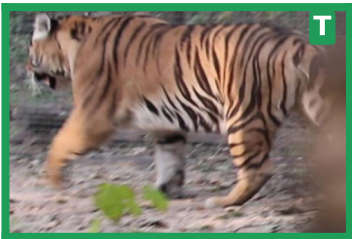

AP = 0.611

correct@5 = 4/5

RIIC-ReID

retrieval

AP = 0.986

correct@5 = 5/5
